## Clean Air Day and the Triple Win 8<sup>th</sup> October 2020

#CleanAirDay   
#TripleWin  
#EPScotland

This webinar explores air quality as a contemporary threat to health and wellbeing. Viewed through the prism of Place, we will examine the potential of policies targeting air pollution not only to improve health and wellbeing but also to secure wider environmental and equity benefits implicit in a 'Triple Win.'

The subsequent webinars will look at  
**Better Places for Public Health**  
and  
**Green and Natural Places**

Together, the physical and social characteristics of the places we live profoundly influence health outcomes for us all. A combination of negative aspects can undermine health and wellbeing, while good places can nurture health and wellbeing and help address the generational inequalities. Over the three webinars we will explore the opportunities of better places to deliver a Triple Win:

- improved health and wellbeing
- enhanced equity
- environmental sustainability

### Who should register?

- ✓ Local Authority Officers
- ✓ Health Boards
- ✓ Policy Officers
- ✓ Consultants

- ✓ Elected Members
- ✓ Anyone who would like to further their understanding of environmental public health concepts
